

## Component Libraries

- Added new components to our [Angular](#) and [React Native](#) component libraries: - For Angular, we now have components for [Drawer](#), [List Item Tag](#), [Spacer](#), [Score card](#), and [Info List Item](#). - For React Native, we now have a [Drawer](#) component.
- Enhanced style override capabilities on all of our React and React Native components
- Adopted [React Native Paper](#) as our official Material component library for React Native projects

## Reusable Workflows

We're excited to announce the availability of our first re-usable workflow: a reusable [Authentication Workflow](#) for React Native apps. This workflow allows teams to use a common implementation for login & registration across different projects (just hook it up to your API).

## Design Patterns

- Migrated React design patterns into a single repository.
- Angular, React Native, and Ionic design patterns will be migrated in an upcoming release.

## PX Blue CLI

The first version of the [PX Blue CLI](#) is now available. This tool allows you to generate new Angular, Ionic, React, or React Native projects pre-loaded with PX Blue components and themes, with no manual configuration required.

## Miscellaneous

- Added search capability to documentation site
- [Sticker Sheet](#) published to the Figma Community
- Bug fixes and improvements
