

Check out our release video for [designers](#)!

GitHub Enterprise Migration

- Migrated our code base to a [GitHub Enterprise](#) to align with other Eaton platform teams.

Documentation Site

- Added style guidelines for designing [app store logos](#).
- Added design guidelines for the [buttons](#) design pattern.
- Added guidelines for how to request, conduct and interpret a [UI design audit](#).
- Added a page featuring a list of currently published [Brightlayer UI based projects](#).

Figma Component Sticker Sheet

- Added new text field-based components, such as Physical Location Address Text Fields, Phone Number Text Fields, to the Figma component sticker sheet.
- Added a new component, App Logo Template, to help designers design their product app store logos.
- Added iPhone's "Dynamic Island" as a component.
- Added a Breadcrumb component.

Angular

- Updated our packages to support Angular 14.

Misc

- Dropped support for Javascript — moving forward all of our packages, examples, and templates will exclusively use Typescript. The Brightlayer UI CLI will now only generate typescript projects.
- Removed our packages' dependency on `@mui/styles`.
- Bug fixes & minor updates.

Package Summary

Angular

- @brightlayer-ui/angular-components v8.0.1 ([Changelog](#))
- @brightlayer-ui/angular-themes v8.0.0 ([Changelog](#))
- @brightlayer-ui/angular-auth-workflow v4.0.0 ([Changelog](#))
