

Documentation Site

- Fresh new documentation site built with PX Blue components
- New [Resources](#) & [Roadmap](#) pages
- New content for [designers](#)

Component Libraries

We are very pleased to announce a new site for our PX Blue component libraries: pxblue-components.github.io. This site includes usage instructions, API documentation, and a playground for you to try out all of our PX Blue components.

We've also introduced new and improved components:

- For React, we have added components for [Drawer](#), [List Item Tag](#), [Spacer](#), and [User Menu](#)

Typescript Migration

- All React and React Native NPM packages are now using Typescript.

Miscellaneous

- Bug fixes and improvements
