Check out our release announcement video for developers!

React

- Updated react resources to use emotion style engine to support use of the `sx` prop introduced as part of MUI v5.0

Documentation Site

- Added VictoryNative to our mobile charting library recommendations for React Native.

- Prepared designs for our component documentation sites; these changes will be implemented in the coming months.

Training Materials

- Created content for our first educational boot camp, an introduction to Brightlayer UI for developers. Contact us to sign up!

- Created a new Figma community file to help onboarding designers new to Eaton.
