Important!: this will be the final release for PX Blue. For our next release, we will be re-branding our platform as _Brightlayer UI_ (Brightlayer User Interface). More details will be coming soon 🤗

Check out our release announcement videos for developers and designers!

Component Libraries

- Updated Angular library to build with Angular 12.

- Documented all the components with JSDocs, viewable with Intellisense.

- Added new icon library for React Native projects and enhanced / simplified icon usage options within the React Native component library.

- All PX Blue React Native components now respond properly to device rotation / orientation.

Component Sticker Sheet

- Updated Figma Component Sticker Sheet to include 57 new device- and channel-related icons. You can also find all of them in our iconography page.

- All icons (Material Design and PX Blue icons) are now searchable by their aliases in Figma.

- Added more system components, including: phone keyboard, phone keypad, status bar, browser window, cursor, system dialog box and time picker.

- Added table components.

Themes

- Style tweaks for Angular chips, drawer, and inputs.

- Enhanced showcase demos for Angular and React to display all PX Blue and Material components in an organized manner.

- Simplified Dark Theming for React Native (eliminated the need for alternate dark theme and provide special pre-themed wrappers for React Native Paper components).

Documentation Site

- Updated Angular and React design pattern code examples for: Account Menu, App Bar, Forms & Validations and Loading & Waiting.

Re-usable Authentication Workflows

- Synchronized resource string translations across all three framework implementations.
- Added ability for users to navigate backwards and adjust previous inputs during registration.
- EULA acceptance screen moved to be the first step of registration processes.

PX Blue CLI

- Updated to build projects with the latest dependencies, resources, and templates.

Miscellaneous

- Bug fixes & minor updates.
- Added copyright information to all our package source code.
- Reorganized the icons and themes repositories for easier organization and maintenance.
- Improved code coverage with unit testing and Cypress.

Package Summary

Angular / Ionic

- @pxblue/angular-components v5.0.1, v6.0.0 (Changelog)
- @pxblue/angular-themes v6.3.0 (Changelog)
- @pxblue/angular-auth-workflow v2.4.0 (Changelog)
- @pxblue/icons v1.7.0 (Changelog)
- @pxblue/icons-svg v1.7.0 (Changelog)
- @pxblue/ng-progress-icons v1.2.1 (Changelog)

React

- @pxblue/react-components v5.3.1 (Changelog)

- @pxblue/react-auth-workflow v2.4.0 (Changelog)

- @pxblue/icons v1.7.0 (Changelog)

- @pxblue/icons-svg v1.7.0 (Changelog)

- @pxblue/icons-mui v2.7.0 (Changelog)

React Native

- @pxblue/react-native-components v5.4.1, v6.0.0 (Changelog)

- @pxblue/react-native-themes v5.2.0 v6.0.0 (Changelog)

- @pxblue/react-native-auth-workflow v3.3.0 (Changelog)

- @pxblue/react-native-vector-icons v1.3.0 (Changelog)

- @pxblue/react-native-progress-icons v1.0.2 (Changelog)
